

WASHINGTON TOWNSHIP

GENERATOR INSTRUCTIONS

Zoning Approval for Generators must be obtained prior to submission to the Building Department.

1. The generator specifications are to be included with the permit applications.
2. Specifications on the transfer switch are required.
3. If you are hiring a contractor to do the installation, simply submit the permit package to the contractor.
4. A gas riser diagram is required.
5. Load calculations & a one line diagram are required (You may use the attached work sheet for load calculations)
6. Completed Electrical and Mechanical Subcodes (Fire subcode is required for commercial buildings)

Note: A plumber's seal is not required for generator gas line installations – Electricians are exempt applicants and are allowed to run gas piping for generators only.

Generators are to be a minimum of 5 feet away from combustibles (building, vegetation, fencing, etc.) per manufacturer's instructions

EV CHARGER INSTRUCTIONS

1. The charger specifications are to be included with the permit applications.
2. Permit application and electrical subcode forms to be filled out.
3. Load calculations are to be provided.
